# SSS GIANT FLOWERED TUBEROUS ROOTED BEGONIAS

MINIMUM ORDER 100 BULBS — NOT LESS THAN 10 BULBS OF A COLOR

## AMERICAN GROWN SELECTED DOUBLE CAMELLIA STRAIN CULTURE

Plant bulbs in flats in a mixture of Peat and Sand or Leaf Mold and Sand, all of which are good media for developing a good root system.

Tubers should be set 3 to 4" apart and about 1/2" below the surface. Keep uniformly moist, but not too wet, in a warm place well lighted until 3 or 4" of growth develops. Then plant in a permanent location or in pots as desired. The front of the plant is always where the tips of the leaves are pointing. Often if dormant tubers are planted in open ground, especially if it is too cold or wet, a number of them may not root and the planting will be uneven, with some coming earlier and some later, with the plant facing in haphazard ways. Started first in flats, they will develop a splendid root system which is necessary for the forming of fine specimen plants.

Before the plants become too large and crowded in flats, transplant in open ground or pots, taking care not to disturb the root system too much. Outdoors in light soil containing a lot of humus will grow good Begonias. Heavy soils should have a strong application of well rotted manure, leaf mold or sand to lighten them. Light gravelly or sandy soils will benefit greatly by the application of peat, leaf mold or well rotted manure. If planting in pots, soil should be much lighter than that used outdoors; 2/3 coarse leaf mold, 1/3 sand or sandy loam will give excellent results.

### AMERICAN GROWN

#### Double Camellia Flowered

Unusually fine selected strain. Giant camellia-like blooms.

COLORS —	Size	Per 100	Per 1000
Apricot, Blush, Cardinal Red, Crimson Rose, American Beauty, Dark Salmon, Dark Red, Light Salmon, Pink, White, Rose, Scarlet, Yellow, Orange, Flame Orange.	1 1/4-1 1/2" 1 1/2-2" 2-2 1/2" 2 1/2" Up	8.50 14.00 19.00 27.50	80.00 130.00 180.00 260.00

### BELGIAN GROWN (continued)

#### Double Hanging Basket

Known as Pendula or Lloydii type. Hundreds of small double flowers produced from a single bulb.

COLORS —	Size	Per 100	Per 1000
Scarlet, Pink, Yellow, White, Orange, Salmon.	1 1/4-1 1/2" 1 1/2-2 1/2"	6.00 10.50	50.00 95.00

#### Double Marmorata (Camellia Type)

Scarlet colored flower spotted and laced white	Size	Per 100	Per 1000
	1 1/4-1 1/2" 1 1/2-2 1/2"	7.00 12.00	60.00 110.00

### BELGIAN GROWN

#### Double Camellia Flowered

Giant double camellia-like flower	Size	Per 100	Per 1000
COLORS —	1 1/4-1 1/2" 1 1/2-2" 2" Up	5.50 9.00 13.00	45.00 75.00 120.00
Crimson, Pink, White, Coppery, Rose, Scarlet, Orange, Yellow, Salmon.			

#### Giant Singles

This type produces largest flowers. Extensively used for bedding.	Size	Per 100	Per 1000
COLORS —	1 1/4-1 1/2" 1 1/2-2" 2" Up	5.50 9.00 13.00	45.00 75.00 120.00
Crimson, Scarlet, Pink, Orange, White, Yellow, Coppery.			

#### Double Rosebud

Flowers of the most exquisite form resembling perfect rosebuds, with beautiful, two-tone, pastel shade coloring	Size	Per 100	Per 1000
	1 1/4-1 1/2" 1 1/2-2 1/2"	7.00 12.00	60.00 110.00

#### Double Frilled or Carnation (Fiml. Plena)

Petals are frilled with serrated edges, flower when in full bloom resembles a Carnation.	Size	Per 100	Per 1000
COLORS —	1 1/4-1 1/2" 1 1/2-2 1/2"	7.00 12.00	60.00 110.00
Crimson, Pink, Orange, White, Yellow, Coppery.			

#### Double Picotee

The flowers are slightly smaller than the large Camellia Type in some instances but of beautiful Camellia form, with two-toned combinations of the colors Pink and White with a definitely contrasting edge	Size	Per 100	Per 1000
	1 1/4-1 1/2" 1 1/2-2 1/2"	7.00 12.00	60.00 110.00

#### Begonia Multiflora (Liliput or Miniature)

Group of double flowered Begonias which are especially adapted for borders. They are best suited for mass plantings and will bloom profusely throughout the summer.

Ami Jean Bard, Copper	Size	Per 100	Per 1000
Bourgemestre Max, Red	1-2"	12.00	110.00
Heien Harms, Yellow	1-2"	13.00	120.00
Le Flamboyant, Scarlet	1-2"	12.00	110.00
Madame R. Gale, Salmon	1-2"	12.00	110.00

# Caladium Notes

**ORDERING:**—Order early, as soon as you are able to determine your needs.

More complete satisfaction may be realized and delay in securing bulb stock avoided by allowing the shipper some leeway in filling your order. When ordering a list of varieties, it is suggested that two or more varieties, depending on the length of the list, be named as desirable substitutes. Often your shipper may be able to supply the variety you wish but only in a smaller sized bulb. Where it is permissible to substitute for size, your permission to do so, where necessary, will facilitate early shipment of your needs. Your shipper will always fill your order as nearly like you place it as possible.

**CARE OF BULBS:** Caladium bulbs are very sensitive to cold temperatures. It is imperative in cold weather and desirable at all times that when your bulbs are received they be removed from the carton and packing material immediately and spread thinly in trays in a warm location with good air circulation. When bulbs are received in winter, **TO JUST BE PLACED IN A WARM LOCATION WITHOUT UNPACKING MAY BE MORE HARMFUL THAN TO LEAVE COOL**, because in warming rapidly a caladium bulb collects moisture and unless it is exposed so that the atmosphere may absorb the moisture mold and decay begins immediately.

Bulbs spread thinly in trays in a dry place that is warm and has good air circulation should hold for any reasonable time until you are ready to plant.

**PLANTING:** Relative to best practice in planting bulbs upside down or as they grew, some prefer one and some the other. Both procedures seem to have some merit and the one used will depend on what is desired. Bulbs planted upside down seem to throw growth into a large number of eyes hence a nicer pot develops in the end, but normally emergence seems to be delayed by the adverse position of the bulb. Hence, if there is plenty of time the upside down practice would probably be best. If a quicker pot is desired the right side up planting is correct.

**CULTURE:** The caladium is a tropical plant and naturally grows best in very warm temperatures, 90 degrees or more. They will grow in lower temperatures, but as the growing temperature is lowered performance is proportionately less desirable in growth and coloration to the point of intolerance.

Caladium are heavy feeders and seem to grow best in a soil with a pH of 5.5 to 6 and with sufficient organic matter to prevent its packing and sealing to the point of locking out air circulation. The pot soil should be loose and fluffy even after continuous and frequent waterings during the growing period.

Caladium should be started in moist soil after roots have started more water is required. As the plant develops it will use more and more water as the leaf area increases and more water is thrown off. Yet the soil should never contain sufficient water to "water-log" or seal our air circulation.

CHART ③

CHART ①

# Chart Guide

1. **Marie Moir.** 2½-3½". A medium tall, vigorous grower that produces a good number of medium large leaves.
2. **Crimson Wave.** A vigorous large leafed variety. Shows finest color where rapid growth is induced.
3. **Vivian Lee.** Similar to Crimson Wave. Medium low growing and a good leafer.
4. **Scarlet Pimpernelle.** Much better than pictured. A vigorous low growing, leafy variety.
- \* 5. **Pink Beauty.** 2½ - 3½". A low growing, leafy variety that shows fine color when healthy growth is induced.
6. **Ace of Hearts.** 2½ - 3½". A good red—low growing, medium leafy and excellent color.
7. **Brilliantissimo.** 1½ - 2½". A medium low growing, vigorous variety. Recommended for its quick growth and resulting early pot sale.
8. **Reconcavo.** A quick growing variety—medium tall with a good number of large leaves.
9. **Triomphe de L'Exposition.** A very strong grower with adequate large leaves. An old but popular red.
10. **Hortulania.** 1½-2½". Low growing medium leafer with outstanding color.
11. **Mrs. W. B. Halderman.** Medium tall with plenty of foliage. Color is outstanding when rapid growth is induced.
12. **Red Flare.** A low growing, leafy variety that produces an outstanding pot.
13. **Spangle Banner.** A good red, low growing, leafy plant that shows good color from the first leaf.
14. **Candidum.** The leading white variety.
- \* 15. **Macahya.** A medium tall, strong grower with ample foliage. Its coloration places it in a field by itself.
16. **Thomas Tomlinson.** A very low growing, very leafy variety that produces an outstanding pot. For best color rapid growth should be induced.
17. **John Peed.** A very fine and popular red variety.
19. **Rising Sun.** 2½-3½". Tall growing and light leafer but its color is outstanding and shows true from the first leaf. Especially recommended for outside planting.
- \* 20. **Lord Derby.** A low growing and very leafy variety that gives a fine pot but with a tendency to fade its color with age.
21. **Red Ensign.** A low growing variety that produces a large number of small leaves with very delicate texture and fine color.
- \* 22. **Seagull.** Low growing and very leafy. A good pot plant and a variation in white.
23. **Mrs. F. Sanders.** A large leafed, vigorous variety with a different coloration. A good outside variety.
24. **Mary Queen of Scots.** A low growing, leafy variety that offers another variation in color.
25. **Attala.** A vigorous, large leafed variety with outstandingly beautiful pink stems.
26. **Dr. D. M. Cook.** Average color not as deep as pictured but shows true from the first leaf.
- \* 27. **Giraud.** A better caladium than pictured. It is a vigorous, rather tall, many leafed variety with a two-toned green and brilliant red splotch coloration.
28. **Blanche Wise.** A low growing, heavy leafing variety that offers another variation in color.
- \* 30. **Sorocoba.** The nearest substitution for Candidum but with a suffusion of delicate pink over the white. A good leafer.
31. **Texas Wonder.** The blue in the picture on this variety is an error in reproduction. It has average characteristics that make it acceptable as a potting plant. Its most odd coloration is its outstanding characteristic. Rather tall.
32. **Edith Meade.** A low growing leafy variety desirable for its delicate white center.
33. **Brazilian Butterfly.** Vigorous, medium tall growing with large leaves. Its coloration is not duplicated by any other caladium variety.

\* These varieties are not recommended for outside plantings. All other varieties will give satisfactory performance either in pots or outside.

NOTE:—The Guide gives some growth characteristics of each variety. Where the variety is a small bulb producer the largest normal size is indicated following the variety name.

# SSS Gloxinias

## BELGIAN GROWN Varieties

*Minimum order 100 Bulbs and not less than 10 of any one variety.*

**Blanche De Meru.** Pinkish rose, white throat.

**Emperor Frederick.** Scarlet bordered white.

**Emperor William.** Violet bordered white.

**Etoile De Feu.** Light scarlet, compact growth.

**Mont Blanc.** Clear glistening white.

**Prince Albert.** Darkest violet, beautifully frilled.

**Princess Elizabeth.** Light blue, white throat.

**Queen Wilhelmina.** Dark rose.

**Roi Des Rouges.** Brilliant crimson scarlet, huge flower beautifully frilled.

**Tigrina** (Spotted and stained hybrids). Large flower with a short throat. Entire blossom veined and spotted, in a mixture of pink, blue, purple, and red markings on white.

**Violacea.** Soft violet.
